15 PUBLISHED STUDIES

Experience the power of science with EpiCor. Clinically shown to support immune health and positively modulate the gut microbiome. In an industry where science is the cornerstone, we are proud to hold the key to innovation.

75
YEARS OF
FERMENTATION
EXPERTISE

75 YEARS OF FERMENTATION EXPERTISE

Leverage a proven history of experience and reliability. From its serendipitous discovery to 75 years of fermentation expertise, our journey is a testament of turning observation into a time-tested commitment to excellence.

EPIC origin story

Serendipitous discovery, intentional advancement.

1900's

As a boy, C.W. Bloomhall observes health improvements of farm animals fed with partially fermented table scraps

1943

Observation turned business; Diamond V makes fermented yeast product to improve the health and productivity of livestock

1990's

Accidental discovery: Diamond V plant workers exposed to fermented product took fewer sick days than office colleagues

2000's

Pilot studies showed that plant workers were healthier; stronger immune systems due to ingesting fermentate

2005

Food-grade facility opens to produce EpiCor, whole food yeast fermentate made specifically for humans

2018

EpiCor becomes a fully owned subsidiary of Cargill and the focus of future scientific research

2021

EpiCor redefined as a postbiotic adhering to the consensus definition published by ISAPP

FORMULATION benefits

As a highly stable ingredient, EpiCor can be easily formulated into dietary supplements, adult nutrition offerings, or even pet food, treats, and supplements.

FORMULATION BENEFITS

INANIMATE, YET EFFECTIVE

As an inanimate ingredient, EpiCor offers increased stability and consistency as compared to more familiar immune ingredients such as probiotics.

LOW DOSE

Clinically studied at a daily dose of only 500mg.

EXTENSIVE SHELF-LIFE

EpiCor offers a three-year shelf life from date of manufacture.

CERTIFICATIONS

UPGRADE YOUR innovation

EpiCor® is an innovative, science-backed postbiotic ingredient clinically shown to support immune health. Derived from the fermentation of *Saccharomyces cerevisiae* (baker's yeast), EpiCor® contains a beneficial mix of metabolites and numerous other health-enhancing bioactive compounds. This complex ingredient has an epic origin story and a track record of success as the focus of 15 published studies. Not only that, but EpiCor® is also the #1 postbiotic ingredient, having been formulated into more products than any postbiotic on the market!
